## PROJECT EXPERIENCE

### URBANSOUND PROJECT

2022 - Present

- Create a webhook using Dialogflow and connects to LINE application to build a chatbot

### BAKE@DOME PROJECT

2022

- Bake@Dome is a POS (point-of-sale) system used within Bake@Dome that is used to sell bakery and drinks, manage financial transactions, control and check the total number of bakery and drinks within the store.
- This project is developed using the MERN system, so it will use MongoDB, Express, React, and Node.
- Deployed a production on an AWS EC2 instance using a CI/CD pipeline built with GitHub Actions and Docker.

## EDUCATION

Thammasat University, Thailand

May 2020 - present

Bachelor's Degree, Faculty of Science and Technology Computer Science

- Introduction to Software Engineering
- Database Systems
- Introduction to Software Testing
- Software Process and Quality Assurance
- Selected Topics in Software Engineering
- Human - Computer Interaction
- Computer Network and Security

## INTERSTS

Web Application (*FullStack, Backend, Frontend*)

Mobile Application

UX/UI Design
